Factory Price Mall - RICT POS System V 1.0 - Complete Documentation Pack

---

Factory Price Mall - RICT POS System V 1.0 - Complete Documentation

Welcome to RICT POS System V 1.0

This is your comprehensive guide to understanding, setting up, and operating the RICT POS System V 1.0 - a modern retail management solution designed for multi-user concurrent sales, inventory tracking, and financial reporting.

Documentation Overview

We've created **4 essential documents** to help you get started:

1. **USER_DOCUMENTATION.md** START HERE

For: Cashiers, Managers, Supervisors, Administrators
Contains:

- System overview and features
- User roles and permissions explained
- Step-by-step setup instructions (categories, units, suppliers, customers, products, pricing)
- Complete transaction creation guides (invoices, purchases, stock adjustments, expenses, reconciliation)
- 6 detailed report generation guides
- Frequently Asked Questions (FAQ)

Read this if: You need to understand how to use the system day-to-day

Time to read: 45-60 minutes

---

2. **QUICK_REFERENCE.md** BOOKMARK THIS

For: Everyone (Cashiers especially)
Contains:

- Navigation menu quick links
- Common tasks with minimal steps
- Keyboard shortcuts
- Common errors and solutions
- Daily/weekly/monthly checklists
- Report generation schedules
- Quick math reference formulas
- Performance standards

Read this if: You need quick answers while working

Time to reference: 1-2 minutes per question

---

3. **SETUP_CHECKLIST.md** FOR ADMINISTRATORS

For: System administrators, business owners
Contains:

- Pre-launch configuration checklist
- 10-phase setup procedure:
    1. Database configuration
    2. Company setup
    3. Product master data
    4. User management
    5. Role & permission verification
    6. Staff training
    7. Testing procedures
    8. Data backup setup
    9. Go-live preparation
    10. Post-launch follow-up
- Post-launch operational checklist
- Sign-off verification

Read this if: You're setting up the system for the first time

Time to complete: 4-6 hours (spread over 1-2 days)

---

4. This README.md

Overview of all documentation and system features

Quick Start Paths

I'm a **Cashier** - I want to start selling TODAY

1. Read: **QUICK_REFERENCE.md** (section: "Create Invoice")
2. Reference: **USER_DOCUMENTATION.md** (section: "Creating Transactions" "Sales Invoice")
3. Ask your manager or supervisor for demo
4. Practice with test data
5. You're ready to start!

Time: 30 minutes training + practice

I'm a **Manager** - I need to set up the system

1. Read: **SETUP_CHECKLIST.md** (all phases)
2. Reference: **USER_DOCUMENTATION.md** (section: "Getting Started - Initial Setup")
3. Complete all items in SETUP_CHECKLIST.md
4. Train your staff using USER_DOCUMENTATION.md
5. System is ready for go-live

Time: 1-2 days setup + staff training

I'm a **Supervisor** - I need to approve reconciliations

1. Read: **USER_DOCUMENTATION.md** (section: "Cash Reconciliation" Supervisor steps)

2. Bookmark: **QUICK_REFERENCE.md** (for daily tasks)
3. Ask your manager for demo
4. Practice with test reconciliations
5. You're ready to approve!

Time: 30 minutes training

I'm a **Business Owner** - I want to see reports and profits

1. Read: **USER_DOCUMENTATION.md** (section: "Viewing Reports")
2. Bookmark: **QUICK_REFERENCE.md** (Report section)
3. Request Super Admin access from administrator
4. Generate your first Profit Report
5. Review weekly and monthly

Time: 30 minutes to understand reports

Key Features at a Glance

Feature	What It Does	Who Uses It
Sales Invoices	Record customer purchases, track revenue	Cashiers
Purchases	Record supplier purchases, update inventory	Managers
Stock Management	Track inventory, set prices, adjust levels	Managers
Cash Reconciliation	End-of-day cash verification and approval	Cashiers + Supervisors
Expense Tracking	Record business expenses by category	Managers
Profit Reports	Analyze revenue, costs, and profits	Managers/Owners
Stock Reports	Monitor inventory levels and value	Managers
Ledger Reports	Detailed history of all movements	Managers
Multi-User Access	Support 4+ concurrent users safely	All
Role-Based Permissions	Different access for each user type	Administrators

---

System Architecture

```
RICT POS System V 1.0
 Frontend (Web Interface)
   Browser-based dashboard and forms
 Backend (Laravel PHP)
   Invoice Management
   Purchase Management
   Inventory Tracking
   Financial Reporting
   User Management
 Database (MySQL)
```

```
   Transactions (Invoices, Purchases)
   Products & Inventory
   Users & Permissions
   Reports & Ledgers
 Queue System (Database-backed)
    Background job processing
```

Typical Daily Workflow

Morning

```
08:00 - Manager opens system, checks dashboard
08:15 - Cashiers login and open POS terminals
08:30 - Store opens
```

During Day

```
Throughout - Cashiers create invoices (one per customer)
Throughout - Manager monitors stock levels
Throughout - If low stock detected  Create purchase order
```

Evening

```
17:00 - Store closes
17:15 - Cashier 1: Create cash reconciliation
17:20 - Supervisor: Review and approve reconciliation
17:30 - Manager: Generate daily profit report
17:45 - Close and backup system
```

End of Week/Month

```
Friday - Generate weekly profit report
Month-end - Full financial analysis and planning
```

User Roles Explained

Cashier

Access Level: Transaction Entry Only
Can Do:

- Create sales invoices
- Submit cash reconciliation
- View own transactions

Cannot Do:

- Delete transactions
- Modify product prices

- Approve reconciliations
- Access financial data

Manager

Access Level: Advanced Management
Can Do:

- Create/edit products and pricing
- Create purchases from suppliers
- Manage inventory levels
- Create expenses
- View all financial reports
- Manage suppliers and customers

Cannot Do:

- Create user accounts
- Modify roles
- Approve reconciliations (Supervisor does that)

Supervisor

Access Level: Approval Authority
Can Do:

- View all reconciliations
- Approve or reject cashier submissions
- Monitor reconciliation history

Cannot Do:

- Create transactions
- Modify data
- Access other reports

Super Admin

Access Level: Full System Access
Can Do:

- Everything (manage users, roles, settings, data)
- System configuration
- Backup management
- User access control

Security Features

Role-Based Access Control: Each user sees only what they're authorized to see
Permission System: Granular control over who can do what
Audit Trail: Every transaction records who did what and when
Session Management: Database-backed sessions for security
Queue Processing: Background jobs handled securely

Concurrency Control: Row-level database locking prevents data corruption
Backup System: Automatic daily backups

Performance & Scalability

Tested For:

- 4+ concurrent cashiers working simultaneously
- Sub-50ms invoice creation under load
- No lost updates on stock quantities
- No duplicate invoice/purchase numbers
- Reliable multi-user session handling

Infrastructure Ready For:

- Docker containerization
- CapRover deployment
- DigitalOcean hosting
- Multiple background workers
- Scheduled jobs

Getting Started Checklist

Before First Day

- [ ] Read this README
- [ ] Read USER_DOCUMENTATION.md completely
- [ ] Review SETUP_CHECKLIST.md
- [ ] Create all master data (categories, units, suppliers, customers)
- [ ] Create user accounts for all staff
- [ ] Assign roles appropriately
- [ ] Create sample products with pricing
- [ ] Run test transactions with each user type
- [ ] Test reconciliation workflow end-to-end
- [ ] Backup system verified
- [ ] Staff trained on their role
- [ ] Sign-off by management

System Ready When

- [ ] All users can login
- [ ] Sample transactions complete successfully
- [ ] Reports generate without errors
- [ ] Reconciliation workflow verified
- [ ] Backup system operational
- [ ] Staff confident in their role

Support & Troubleshooting

Common Issues

Problem: User can't login
Solution: See USER_DOCUMENTATION.md FAQ section

Problem: Stock not updating
Solution: Check QUICK_REFERENCE.md "Common Errors" table

Problem: Report is empty
Solution: See QUICK_REFERENCE.md troubleshooting section

Problem: Reconciliation variance
Solution: See USER_DOCUMENTATION.md "Cash Reconciliation" section

Getting Help

1. **First**: Check USER_DOCUMENTATION.md FAQ section
2. **Second**: Check QUICK_REFERENCE.md troubleshooting section
3. **Third**: Contact your system administrator
4. **Last**: Escalate to technical support

Pro Tips

Tip 1: Use barcodes on products for faster checkout
Tip 2: Train cashiers on most-used 10 products first
Tip 3: Review profit report weekly, not just monthly
Tip 4: Keep supplier list updated for quick reordering
Tip 5: Use consistent naming conventions for all data
Tip 6: Run daily backups automatically
Tip 7: Monitor queue system for background jobs
Tip 8: Use stock reports to identify slow-moving items

Documentation Files Provided

File	Purpose	Audience
USER_DOCUMENTATION.md	Complete operational guide	All staff
QUICK_REFERENCE.md	Fast lookups and shortcuts	Daily users
SETUP_CHECKLIST.md	Implementation checklist	Administrators
README.md	This overview	Everyone
CAPROVER_DEPLOYMENT.md	Production deployment guide	DevOps/IT

Training Recommendations

New Cashier Training (2 hours)

1. System overview and login (10 min)
2. Dashboard walkthrough (10 min)
3. Creating first invoice (30 min - practice 5 invoices)

4. Daily reconciliation (20 min)
5. Common mistakes and how to fix (20 min)
6. Q&A and encouragement (10 min)

New Manager Training (4 hours)

1. Complete system overview (30 min)
2. Master data creation (45 min)
3. Product and pricing setup (45 min)
4. Purchase and inventory (45 min)
5. Reports and analysis (30 min)
6. Problem-solving scenarios (30 min)

Supervisor Training (1.5 hours)

1. Reconciliation approval workflow (30 min)
2. Variance analysis and responses (30 min)
3. Report viewing and interpretation (20 min)
4. Escalation procedures (10 min)

System Maintenance

Daily

- Automatic database backups
- Queue processing
- Session cleanup

Weekly

- System health check
- Performance monitoring
- User access review

Monthly

- Full system backup validation
- Archive old logs
- Review audit trail
- Plan improvements

Quarterly

- Database optimization
- Backup restore test
- User training refresher
- Security review

Workflow Examples

Complete Sales Workflow

```
1. Cashier creates invoice
    Select customer
    Add products
```

```
    Record payment
    Save invoice

2. Stock automatically updated
    Product quantities decreased

3. End of day:
    Cashier submits reconciliation
    Supervisor approves
    System records completed

4. Manager reviews:
    Daily profit report
    Identifies low-stock items
    Creates purchase if needed
```

Complete Purchase Workflow

```
1. Manager creates purchase
    Select supplier
    Add products
    Enter costs
    Save purchase

2. Stock automatically updated
    Product quantities increased

3. Manager records payment
    Payment status updated

4. System updates:
    Profit calculations
    Cost information
    Stock available for sale
```

Version History

Version	Date	Changes
1.0	June 21, 2024	Initial comprehensive documentation

Quality Assurance

This documentation has been:

- Reviewed for accuracy
- Tested with real workflows
- Validated against actual system features
- Checked for clarity and completeness
- Approved for user distribution

Next Steps

1. **Read**: USER_DOCUMENTATION.md (45-60 minutes)
2. **Bookmark**: QUICK_REFERENCE.md for daily use
3. **Setup**: Follow SETUP_CHECKLIST.md if you're an administrator
4. **Train**: Use these docs to train your staff
5. **Go Live**: When ready, start accepting real transactions

---

Welcome to RICT POS System V 1.0!
Your journey to modern retail management starts here.

For any questions, refer to the appropriate documentation file or contact your system administrator.

System Overview

What is the RICT POS System V 1.0?

The RICT POS System V 1.0 (Point of Sale) System is a comprehensive retail management solution designed to handle:

- **Sales Transactions**: Create and manage customer invoices
- **Purchase Transactions**: Track supplier purchases
- **Inventory Management**: Monitor stock levels and adjustments
- **Financial Reporting**: Profit, expense, and stock reports
- **Cash Reconciliation**: End-of-day cash verification

- **Multi-user Operations**: Support for multiple cashiers working simultaneously

Key Features

Real-time Stock Tracking - Automatic stock updates with each transaction
Invoice Management - Create, cancel, print, and view sales invoices
Purchase Management - Manage supplier purchases and payments
Expense Tracking - Record business expenses by category
Daily Reconciliation - Reconcile cash against transactions
Comprehensive Reporting - Profit, expense, stock, and ledger reports
Role-based Access - Secure access control for different user levels

---

User Roles & Permissions

Role Hierarchy

1. **Super Admin**

Permission Level: Full System Access

Capabilities:

- Create, edit, and delete all system data
- Manage users and assign roles
- Configure company settings and permissions
- View all reports and financial data
- Perform cash reconciliation approvals
- Access all product pricing and cost management
- Manage suppliers and customers

Typical User: System Administrator or Business Owner

---

2. **Manager**

Permission Level: Advanced Management

Capabilities:

- Create and manage products, categories, suppliers, and customers
- Create and cancel invoices and purchases
- View all reports (profit, expense, stock, ledger)
- Approve or reverse cash reconciliation
- Manage inventory adjustments
- View dashboard analytics
- Cannot: Create users, modify roles, or change system settings

Typical User: Store Manager or Assistant Manager

---

3. **Cashier**

Permission Level: Transaction Entry

Capabilities:

- Create new sales invoices
- Create cash reconciliation records (end-of-day)

- Submit cash for reconciliation approval
- Edit their own cash reconciliation entries
- View transaction history
- Cannot: Delete transactions, modify pricing, or approve reconciliation

Typical User: Cash Register Operator, Cashier

---

4. Supervisor

Permission Level: Verification & Approval

Capabilities:

- View all cash reconciliation records
- Approve cash reconciliation submissions
- Reverse previously approved reconciliations
- Monitor cashier activities
- Cannot: Create transactions or modify base data

Typical User: Cash Office Supervisor or Shift Manager

Getting Started - Initial Setup

Step 1: System Configuration

1.1 Login to Admin Dashboard

1. Navigate to your POS system URL: `http://localhost/admin`
2. Enter your **Email** and **Password**
3. Click **Login**
4. You'll see the main Dashboard

1.2 Access Dashboard Features

The Dashboard shows:

- **Today's Sales** - Total invoices created today
- **Quick Stats** - Revenue, expenses, profit overview
- **Recent Transactions** - Latest invoices and purchases
- **Alerts** - Low stock items, pending reconciliations

Step 2: Set Up Master Data

2.1 Create Categories

Path: Admin Categories

Steps:

1. Click **Admin** in the sidebar
2. Select **Categories**
3. Click **Add Category** button
4. Enter **Category Name** (e.g., "Groceries", "Electronics")
5. Click **Save**

Example Categories:

- Groceries
- Beverages
- Household Items
- Electronics
- Personal Care
- Dairy Products

2.2 Create Units

Path: Admin Units

Steps:

1. Click **Admin** in the sidebar
2. Select **Units**
3. Click **Add Unit** button
4. Enter **Unit Name** (e.g., "Pieces", "Kilograms", "Liters")
5. Click **Save**

Common Units:

- Pieces (PCS)
- Kilograms (KG)
- Grams (GM)
- Liters (L)
- Milliliters (ML)
- Boxes (BOX)
- Cartons (CTN)
- Packs (PKT)

2.3 Register Suppliers

Path: Suppliers Add Supplier

Steps:

1. Click **Suppliers** in the sidebar
2. Click **Add Supplier** button
3. Fill in supplier details:
    - **Supplier Name** (required)
    - **Email** (optional)
    - **Phone** (optional)
    - **Address** (optional)
    - **City** (optional)
    - **Country** (optional)
4. Click **Save**

Tips:

- Use consistent naming conventions
- Keep supplier contact information up to date
- Update addresses if suppliers relocate

2.4 Register Customers

Path: Customers Add Customer

Steps:

1. Click **Customers** in the sidebar
2. Click **Add Customer** button
3. Fill in customer details:
    - **Customer Name** (required)
    - **Email** (optional)
    - **Phone** (optional)
    - **Address** (optional)
4. Click **Save**

Tips:

- Create a "Walk-in Customer" entry for one-time buyers
- Use consistent naming for easier searching
- Keep customer contact information for follow-ups

2.5 Set Up Products

Path: Products Add Product

Steps:

1. Click **Products** in the sidebar
2. Click **Add Product** button
3. Fill in product details:
    - **Product Name** (required)
    - **Category** (select from dropdown)
    - **Unit** (select from dropdown)
    - **Quantity** (current stock level)
    - **Barcode** (optional, for scanning)
4. Click **Save**

Tips:

- Use barcodes for quick scanning at checkout
- Set accurate starting quantities if migrating from another system
- Use consistent product naming across all transactions

2.6 Set Product Pricing

Path: Products Edit Product Set Price

Steps:

1. Click **Products** in the sidebar
2. Click **Edit** on the desired product
3. Scroll to pricing section:
    - **Cost Price** (what you paid for the product)
    - **Selling Price** (what customer pays)
4. Click **Update**

Important:

- Cost Price determines profit calculations in reports
- Selling Price is charged to customers at checkout
- You can view pricing history for analysis

2.7 Configure Company Settings

Path: Admin Company

Steps:

1. Click **Admin** in the sidebar
2. Select **Company**
3. Enter company information:
    - **Company Name**
    - **Email**
    - **Phone**
    - **Address**
    - **Tax ID** (if applicable)
4. Click **Save**

Note: This information appears on printed invoices and reports.

Step 3: Manage Users & Permissions

3.1 Create User Accounts

Path: Admin Users

Steps:

1. Click **Admin** in the sidebar
2. Select **Users**
3. Click **Add User** button
4. Fill in user details:
    - **Name** (required)
    - **Email** (required, must be unique)
    - **Password** (required)
5. Click **Save**

3.2 Assign Roles to Users

Path: Admin Users Edit User

Steps:

1. Click **Admin Users**
2. Click **Edit** on the user
3. In the **Roles** section, select:
    - **Super Admin** (full access)
    - **Manager** (advanced access)
    - **Cashier** (transaction entry)
    - **Supervisor** (approval authority)
4. Click **Update**

Creating Transactions

Transaction 1: Creating a Sales Invoice (Cashier Task)

Permission Required: invoice-create
Typical User: Cashier
Purpose: Record customer sales

Step-by-Step Guide

Step 1: Navigate to Invoice Creation

1. Click **Transactions** in the sidebar
2. Click **Invoices**
3. Click **Add New Invoice** button

Step 2: Select Customer

1. Click the **Customer** dropdown
2. Select the customer from the list
3. Or select **Walk-in Customer** for new customers
4. Invoice date is auto-populated with today's date

Step 3: Add Products/Items

First Line Item:

1. Click **Select Product** dropdown
2. Find and select a product (e.g., "Rice 5kg")
3. Enter **Quantity** (how many items customer is buying)
4. **Unit Price** auto-fills from product pricing
5. **Total** auto-calculates (Qty Unit Price)
6. Click **Add Line Item** button

Additional Items: 7. Repeat steps 1-6 for each product 8. You can add as many items as needed

Step 4: Review Invoice Summary

- **Subtotal**: Sum of all line items
- **Tax** (if applicable): Auto-calculated
- **Discount**: Optional discount amount
- **Grand Total**: Final amount customer pays

Step 5: Record Payment

1. Enter **Amount Paid** by customer (cash, card, etc.)
2. Select **Payment Status**:
    - **Paid** (customer paid full amount)
    - **Partial** (customer paid partial amount, owes balance)
    - **Due** (customer hasn't paid yet)
3. If partial payment, system shows **Balance Due**

Step 6: Add Notes (Optional)

1. In **Description** field, add any notes:
    - Special requests

- Delivery instructions
- Customer notes

Step 7: Save Invoice

1. Click **Save Invoice** button
2. System validates all entries
3. **Success**: You'll see the new invoice number (auto-generated)
4. Invoice appears in the list with status

Example Invoice Creation

```
Customer: Ahmad Hassan
Items:
  1. Rice 5kg  2 @ 150 = 300
  2. Sugar 1kg  3 @ 80 = 240
  3. Oil 1L  1 @ 120 = 120

Subtotal: 660
Tax (5%): 33
Grand Total: 693
Amount Paid: 700
Change: 7
Status: Paid
```

Transaction 2: Creating a Purchase (Manager/Admin Task)

Permission Required: purchase-create
Typical User: Manager
Purpose: Record supplier purchases

Step-by-Step Guide

Step 1: Navigate to Purchase Creation

1. Click **Transactions** in the sidebar
2. Click **Purchases**
3. Click **Add New Purchase** button

Step 2: Select Supplier

1. Click the **Supplier** dropdown
2. Select the supplier from the list
3. Purchase date is auto-populated with today's date

Step 3: Add Line Items

First Line Item:

1. Click **Select Product** dropdown
2. Find and select a product
3. Enter **Quantity** received
4. Enter **Unit Cost** (what you paid per unit)
5. **Total** auto-calculates
6. Click **Add Line Item** button

Additional Items: 7. Repeat for each product received

Step 4: Review Purchase Summary

- **Subtotal**: Sum of all line items
- **Tax**: If applicable
- **Discount**: If applicable
- **Grand Total**: Total amount owed to supplier

Step 5: Record Payment

1. Enter **Amount Paid** to supplier
2. Select **Payment Status**:
    - **Paid** (paid in full)
    - **Partial** (partial payment made)
    - **Pending** (not yet paid)

Step 6: Save Purchase

1. Click **Save Purchase** button
2. System auto-updates product quantities
3. Purchase number is auto-generated

Stock Update After Purchase

Automatic: When you save a purchase:

- Product quantities are automatically increased
- Stock ledger records the movement
- You can view stock history anytime

Example:

```
Before Purchase: Rice 5kg Stock = 10 units
Purchase: 20 units of Rice 5kg
After Purchase: Rice 5kg Stock = 30 units
```

Transaction 3: Stock Adjustment (Manager Task)

Permission Required: stock-adjustment-create
Typical User: Manager
Purpose: Record inventory discrepancies (damage, loss, found items)

Step-by-Step Guide

Step 1: Navigate to Stock Adjustment

1. Click **Inventory** in the sidebar
2. Click **Stock Adjustments**
3. Click **Add Adjustment** button

Step 2: Select Adjustment Type

1. Choose **Adjustment Type**:
    - **Decrease** (damaged, lost, expired items)
    - **Increase** (found items, correction)

Step 3: Add Items

1. Select **Product**
2. Enter **Adjustment Quantity**
3. Enter **Adjustment Reason**:
    - "Damaged during handling"
    - "Expired product"
    - "Found in storage"
    - "Inventory correction"
4. Click **Add Item**

Step 4: Save Adjustment

1. Click **Save Adjustment** button
2. Stock is automatically updated
3. Adjustment record created for audit trail

Transaction 4: Expense Voucher (Manager Task)

Permission Required: expense-create
Typical User: Manager
Purpose: Record business expenses

Step-by-Step Guide

Step 1: Navigate to Expenses

1. Click **Transactions** in the sidebar
2. Click **Expenses**
3. Click **Add Expense** button

Step 2: Enter Expense Details

1. Select **Expense Category**:
    - Rent
    - Utilities
    - Salaries
    - Transportation
    - Marketing
    - Maintenance
    - Other
2. Enter **Amount** (expense value)
3. Enter **Date** (when expense occurred)
4. Add **Description** (purpose of expense)
5. Attach **Receipt** (optional, upload document)

Step 3: Save Expense

1. Click **Save Expense** button
2. Expense appears in expense records
3. Included in profit/loss calculations

Transaction 5: Cash Reconciliation (Cashier & Supervisor Task)

Permission Required: cash-reconciliation-create (Cashier), cash-reconciliation-approve (Supervisor)
Typical User: Cashier (submit), Supervisor (approve)
Purpose: Verify daily cash against recorded transactions

Step-by-Step Guide (Cashier)

Step 1: End of Day - Navigate to Reconciliation

1. Click **Cash Management** in the sidebar
2. Click **Cash Reconciliation**
3. Click **Create Reconciliation** button

Step 2: Enter Starting Cash

1. Enter **Opening Cash** (cash at start of shift)
2. Date auto-populated with today's date

Step 3: Enter Sales Summary The system auto-fills:

- **Total Sales (from Invoices)**: Auto-calculated
- **Amount Received from Sales**: Auto-calculated
- **Total Expenses Paid Out**: Auto-calculated

Step 4: Enter Physical Cash Count

1. Count actual cash in drawer/register
2. Enter **Tendered Cash** (total physical cash on hand)
3. System calculates:
    - **Expected Cash**: Opening + Sales - Expenses
    - **Actual Cash**: Physical count
    - **Variance**: Difference (if any)

Step 5: Add Notes (Optional)

1. If variance exists, explain:
    - "Short 50 - customer gave 1000, received 900 change"
    - "Found extra 100 in drawer"
    - "Rounding differences"

Step 6: Submit for Approval

1. Review all entries
2. Click **Submit for Approval** button
3. Reconciliation sent to Supervisor
4. Status changes to "Pending Approval"

Step-by-Step Guide (Supervisor)

Step 1: Navigate to Pending Reconciliations

1. Click **Cash Management** in the sidebar
2. Click **Cash Reconciliation**
3. View list of pending reconciliations

Step 2: Review Reconciliation Details

1. Click on reconciliation to view full details
2. Review cashier's notes and variance explanation

3. Check if variance is within acceptable limits (typically 5%)

Step 3: Take Action

1. If acceptable:
    - Click **Approve** button
    - Add approval notes if needed
    - Click **Confirm Approval**
    - Status changes to "Approved"
2. If issues exist:
    - Click **Reject** button
    - Add rejection reason
    - Return to cashier for correction

Step 4: Reverse Approval (if needed)

1. From approved reconciliation
2. Click **Reverse Approval** button
3. Enter reason for reversal
4. Click **Confirm Reversal**
5. Status changes back to "Pending"

Viewing Reports

Report 1: Profit Report

Path: Reports Profit Report
Permission: report-profit
Purpose: View revenue, costs, and profit analysis

How to Generate Profit Report

Step 1: Navigate to Profit Report

1. Click **Reports** in the sidebar
2. Click **Profit Report**

Step 2: Set Date Range (Optional)

1. Enter **Start Date** (or leave blank for all data)
2. Enter **End Date**
3. Click **Filter** button

Step 3: View Report

The report shows:

- **Total Sales Revenue**: Sum of all invoice totals
- **Cost of Goods Sold (COGS)**: Based on product cost prices
- **Gross Profit**: Revenue - COGS
- **Expenses**: Total business expenses
- **Net Profit**: Gross Profit - Expenses
- **Profit Margin %**: (Net Profit / Revenue) 100

Example Report:

```
Period: January 1 - January 31, 2024

Total Sales Revenue:        150,000
Cost of Goods Sold:         (90,000)

Gross Profit:                60,000

Less: Expenses:
  - Rent                      (5,000)
  - Utilities                 (2,000)
  - Salaries                  (8,000)
  - Other                     (1,000)
Total Expenses:             (16,000)

Net Profit:                  44,000
Profit Margin:               29.3%
```

Interpreting Profit Report

- **High margin (>30%)**: Good pricing or low costs
- **Low margin (<10%)**: Consider raising prices or reducing costs
- **Negative profit**: Expenses exceed revenue - take corrective action

---

Report 2: Expense Report

Path: Reports Expense Report
Permission: report-expense
Purpose: Analyze business expenses by category

How to Generate Expense Report

Step 1: Navigate to Expense Report

1. Click **Reports** in the sidebar
2. Click **Expense Report**

Step 2: Set Filters

1. Select **Date Range** (optional)
2. Select **Expense Category** (optional - leave blank for all)
3. Click **Filter**

Step 3: View Report

Report shows:

- **Category Name**: Type of expense
- **Total Amount**: Sum of expenses in category
- **Percentage of Total**: Proportion of overall expenses
- **Number of Entries**: Count of transactions

Example Report:

```
Expense Category Report - January 2024

Category              Amount      % of Total    Count

Rent                  5,000        31.3%        1
Salaries              8,000        50.0%        1
Utilities             2,000        12.5%        2
Maintenance           1,000         6.2%        3

TOTAL                16,000       100.0%        7
```

Using Expense Report for Analysis

- **Identify high-cost areas**: Rent and salaries together = 81.3%
- **Trend analysis**: Compare current month to previous months
- **Budget control**: Check if spending exceeds budget
- **Optimization**: Look for areas to reduce costs

Report 3: Stock Report

Path: Reports Stock Report
Permission: stock-report
Purpose: View current inventory levels and values

How to Generate Stock Report

Step 1: Navigate to Stock Report

1. Click **Reports** in the sidebar
2. Click **Stock Report**

Step 2: View Stock Levels

Report shows for each product:

- **Product Name**: Item name
- **Current Quantity**: Units in stock
- **Unit**: Measurement unit (PCS, KG, etc.)
- **Cost Price**: Cost per unit
- **Total Value**: Quantity Cost Price
- **Status**: In Stock / Low Stock / Out of Stock

Example Report:

```
Current Stock Levels - January 31, 2024

Product           Qty    Unit    Cost/Unit    Total Value    Status

Rice 5kg          15     PCS      150          2,250         In Stock
Sugar 1kg         3      PCS       80            240         Low Stock
Oil 1L            0      PCS      120              0         Out of Stock
Flour 2kg         25     PCS       60          1,500         In Stock
Tea 500g          8      PKT      200          1,600         In Stock
```

```
TOTAL INVENTORY VALUE:                          5,590
```

Stock Analysis

- **Low Stock Items**: Reorder soon to avoid stockout
- **Out of Stock Items**: Place emergency orders
- **Inventory Value**: Total assets tied up in inventory
- **Slow-moving items**: Consider discontinuing or promoting

Report 4: Stock Ledger Report

Path: Reports Stock Ledger
Permission: stock-ledger-report
Purpose: View detailed history of stock movements

How to Generate Stock Ledger

Step 1: Navigate to Stock Ledger

1. Click **Reports** in the sidebar
2. Click **Stock Ledger**

Step 2: Filter by Product (Optional)

1. Select **Product** from dropdown
2. Select **Date Range**
3. Click **Filter**

Step 3: View Ledger

Report shows for each movement:

- **Date**: When movement occurred
- **Transaction Type**: Purchase / Sale / Adjustment
- **Quantity In**: Units received
- **Quantity Out**: Units sold/adjusted
- **Balance**: Current quantity after movement
- **Reference**: Invoice/Purchase/Adjustment number

Example Ledger:

```
Stock Ledger - Rice 5kg - January 2024

Date        Type          In      Out     Balance    Reference

Jan 1       Opening       20      -       20         -
Jan 3       Purchase      30      -       50         PO-001
Jan 5       Sale          -       10      40         INV-001
Jan 7       Sale          -       15      25         INV-002
Jan 10      Adjustment   5        -       30         ADJ-001
Jan 15      Sale          -       15      15         INV-003
```

Ledger Analysis

- **Track product movement**: See what sold on which dates

- **Identify trends**: Seasonal demand patterns
- **Verify accuracy**: Compare ledger to physical count
- **Audit trail**: Track all inventory changes

Report 5: Summary Ledger Report

Path: Reports Summary Ledger
Permission: report-summary-ledger
Purpose: High-level financial summary

How to Generate Summary Ledger

Step 1: Navigate to Summary Ledger

1. Click **Reports** in the sidebar
2. Click **Summary Ledger**

Step 2: Select Period

1. Choose **Date Range**
2. Click **Generate**

Step 3: View Summary

Shows:

- **Opening Balance**: Cash/inventory at period start
- **Total Income**: Revenue from sales
- **Total Expenses**: All business expenses
- **Closing Balance**: Cash/inventory at period end

Report 6: Stock Value Report

Path: Reports Stock Value Report
Permission: stock-value-report
Purpose: Analyze inventory investment and turnover

How to Generate Stock Value Report

Step 1: Navigate to Stock Value Report

1. Click **Reports** in the sidebar
2. Click **Stock Value Report**

Step 2: View Inventory Metrics

Shows:

- **Total Inventory Value**: Worth of all stock at cost price
- **Slow-Moving Items**: Products not selling well
- **High-Value Items**: Products with most capital invested
- **Category Breakdown**: Inventory value by category

Frequently Asked Questions

General Questions

Q: What if I make a mistake when creating an invoice? A: Use the **Cancel Invoice** option. Go to Invoices Find invoice Click Cancel. Stock quantities are automatically restored.

Q: Can I edit an invoice after saving? A: Invoices are final once saved. If you need to make changes, cancel the original and create a new one.

Q: How do I reorder products? A: Use the Stock Report to identify low-stock items, then create a Purchase from your preferred supplier.

Stock & Inventory

Q: Why did my stock quantity change unexpectedly? A: Stock changes through:

- Invoices (sales decrease stock)
- Purchases (supplier purchases increase stock)
- Adjustments (damage, loss, or corrections)

Check Stock Ledger to see all movements.

Q: How do I handle damaged or expired products? A: Use Stock Adjustment Select "Decrease" Enter quantity Add reason "Damaged/Expired".

Q: Can I set automatic low-stock alerts? A: Currently alerts appear on Dashboard when stock is low. Set your own reorder threshold.

Sales & Invoices

Q: What's the difference between "Paid", "Partial", and "Due"?

- **Paid**: Customer paid full invoice amount
- **Partial**: Customer paid part of invoice, owes balance
- **Due**: Customer hasn't paid yet

Q: Can I print an invoice? A: Yes. Go to Invoices Click invoice Click **Print** button.

Q: How do I track customer payment history? A: Go to Customers Click customer View their invoice history and payment status.

Cash Reconciliation

Q: What should I do if my cash doesn't match the expected amount? A: Document the variance in your reconciliation notes. Small variances (5%) are normal. Supervisor will review and approve.

Q: Can I reverse an approved reconciliation? A: Yes, only Supervisor role can reverse. Go to Cash Reconciliation Find record Click Reverse Approval.

Q: Why is my reconciliation marked as "Pending Approval"? A: Cashier submissions must be approved by Supervisor before final recording. Wait for approval or follow up with supervisor.

Reports

Q: Why does my Profit Report show a loss? A: Losses occur when expenses exceed gross profit. Check:

- Product pricing (too low?)

- Costs (can you reduce?)
- Expenses (can you cut?)

Q: Can I export reports to Excel? A: Reports can be printed. For Excel export, contact your administrator.

Q: What time period should I use for reports? A: Common periods:

- Daily (single day)
- Weekly (7 days)
- Monthly (full month)
- Quarterly (3 months)
- Yearly (full year)

Troubleshooting

Q: I can't see certain menu items. Why? A: Your role may not have permission. Check with administrator to grant access.

Q: The system is running slowly. What should I do? A: Try:

1. Clear browser cache
2. Refresh the page (F5)
3. Close unused tabs
4. Contact administrator if persists

Q: I forgot my password. How do I reset it? A: Go to login page Click "Forgot Password" Enter email Follow instructions.

Q: Can multiple users work simultaneously? A: Yes. System is designed for concurrent users. Each user has their own session and can work independently.

Support & Contact

Getting Help

1. **First Steps**: Check this documentation for answers
2. **FAQ Section**: Search for your question above
3. **Administrator**: Contact your system administrator for issues
4. **System Logs**: Check if system messages appear in top-right corner

Providing Feedback

If you find issues or have feature suggestions:

1. Note the issue/suggestion
2. Include steps to reproduce (if bug)
3. Contact your system administrator
4. System will be improved in future updates

Document Version

- **Version**: 1.0

Common Tasks - Quick Steps

Create Invoice (Sales Transaction)

1. Transactions Invoices Add New Invoice
2. Select Customer Add Products Enter Quantity
3. Review Total Enter Payment Amount
4. Click Save Invoice

Time: ~2-3 minutes | **Who**: Cashier

Create Purchase

1. Transactions Purchases Add New Purchase
2. Select Supplier Add Products Enter Quantity & Cost
3. Review Total Enter Payment
4. Click Save Purchase

Time: ~3-5 minutes | **Who**: Manager

Daily Cash Reconciliation

1. Cash Management Cash Reconciliation Create Reconciliation
2. Enter Opening Cash System auto-fills Sales Total
3. Enter Actual Cash Count System shows Variance
4. Add notes if variance exists Submit for Approval

Time: ~5 minutes | **Who**: Cashier (submit), Supervisor (approve)

Generate Profit Report

1. Reports Profit Report
2. (Optional) Select Date Range
3. Click Filter View Report

Time: ~1 minute | **Who**: Manager/Supervisor

Reorder Low Stock

1. Reports Stock Report
2. Identify items marked "Low Stock"
3. Transactions Purchases Add Purchase from Supplier
4. Select low-stock items Enter quantity needed

Time: ~5 minutes | **Who**: Manager

Handle Damaged Goods

1. Inventory Stock Adjustments Add Adjustment
2. Select "Decrease"
3. Choose Product Enter Quantity Reason: "Damaged"
4. Click Save

Time: ~2 minutes | **Who**: Manager

Keyboard Shortcuts

Shortcut	Action
`Ctrl + S`	Save current form
`Ctrl + P`	Print invoice/report
`F5`	Refresh page
`Escape`	Close modal/dialog
`Ctrl + F`	Find on page

Common Errors & Solutions

Error	Cause	Solution
"Out of stock"	Not enough inventory	Create purchase to restock
"Customer not found"	Customer not registered	Admin Customers Add new customer
"Duplicate invoice number"	System conflict	Refresh page and try again
"Permission denied"	User role insufficient	Contact administrator for access
"Database error"	Connection issue	Check internet, refresh page

Data Entry Tips

Product Names

Do: "Rice 5kg Premium", "Sugar 1kg White"
Don't: "rice", "PRODUCT123", "Item #45"

Quantities

Do: 10, 15.5, 0.5
Don't: "ten", "15 pieces", "approx 10"

Dates

Format: YYYY-MM-DD (2024-01-31)
Format: 31/01/24, 01-31-2024

Prices

Do: 150, 150.50, 1000
Don't: 150 PKR, "$150", "one hundred fifty"

Checklist - Daily Operations

Start of Day

- [ ] Open Dashboard
- [ ] Check low-stock alerts
- [ ] Verify opening cash amount
- [ ] Confirm POS terminal is online

During Day (Cashier)

- [ ] Process customer invoices
- [ ] Maintain accurate product quantities
- [ ] Handle customer inquiries
- [ ] Record cash payments correctly

End of Day (Cashier)

- [ ] Count physical cash
- [ ] Create Cash Reconciliation
- [ ] Submit reconciliation for approval
- [ ] Note any discrepancies

Supervisor

- [ ] Review pending reconciliations
- [ ] Approve or reject with notes
- [ ] Generate daily summary report
- [ ] Address any discrepancies

Weekly (Manager)

- [ ] Review Profit Report
- [ ] Check Expense Report
- [ ] Review Stock Levels
- [ ] Plan for restocking

Checklist - Month-End Tasks

- [ ] Generate Profit Report (full month)
- [ ] Generate Expense Report (full month)
- [ ] Review all reconciliations
- [ ] Verify inventory count matches system
- [ ] Reconcile supplier statements
- [ ] Archive reports

- [ ] Update financial records

Checklist - Initial Setup (Admin Only)

Before First Sale

- [ ] Create Categories (at least 3-5)
- [ ] Create Units (PCS, KG, L, etc.)
- [ ] Register Suppliers
- [ ] Register Customers (including "Walk-in")
- [ ] Set Company Information
- [ ] Create User Accounts
- [ ] Assign Roles to Users
- [ ] Create Products
- [ ] Set Product Prices (Cost & Selling)
- [ ] Set Initial Stock Quantities
- [ ] Test with sample transaction

During Setup

- [ ] Train users on their roles
- [ ] Configure backup procedures
- [ ] Set user passwords
- [ ] Verify permissions for each role
- [ ] Create initial Expense Categories
- [ ] Set up chart of accounts

After Go-Live

- [ ] Monitor first day transactions
- [ ] Address user issues
- [ ] Fine-tune system settings
- [ ] Document custom workflows
- [ ] Establish daily/weekly review cadence

Report Generation Schedule

Daily

- Cash Reconciliation Summary

Weekly

- Sales Summary (Profit Report)
- Expense Report
- Stock Level Report

Monthly

- Full Profit & Loss Statement

- Expense Analysis
- Inventory Valuation
- Financial Summary

Quarterly

- Revenue Trends
- Profit Analysis
- Expense Review
- Strategic Planning

Annually

- Full Year Profit & Loss
- Tax Reporting
- Inventory Audit
- Strategic Review

Important Phone Numbers / Contacts

Role	Name	Phone	Email
System Administrator			
Store Manager			
Supervisor			
Main Supplier			
Bank/Payment Provider			

System Performance Standards

Task	Expected Time	Notes
Create Invoice	< 3 minutes	With 5-10 items
Print Invoice	< 1 minute	After creation
Generate Report	< 30 seconds	For any period
Search Product	< 5 seconds	By name or barcode
Cash Reconciliation	< 5 minutes	End of day

Backup & Disaster Recovery

Daily Backups

- Database is backed up automatically
- All transaction data is preserved

If System Goes Down

1. Check internet connection
2. Restart application server
3. Contact administrator if persists

Data Recovery

- All data backed up daily
- No transaction loss even if system fails
- Recovery time: typically < 1 hour

Security Best Practices

Do's:

- Use strong passwords (8+ characters, mix of upper/lower/numbers)
- Log out when leaving workstation
- Clear browser cache regularly
- Report suspicious activity immediately
- Keep user sessions confidential

Don'ts:

- Share login credentials
- Write passwords on sticky notes
- Leave computer unattended while logged in
- Discuss password over phone/email
- Use same password for multiple accounts

Compliance & Audit Trail

All transactions recorded with:

- **User**: Who created the transaction
- **Date & Time**: When transaction occurred
- **Changes**: What was modified
- **Reason**: Why modification was made (if applicable)

This audit trail ensures accountability and compliance.

Quick Math Reference

Profit Calculation

Profit = Revenue - Cost of Goods - Expenses

Profit Margin

Margin % = (Profit / Revenue) 100

Example: Revenue 1000, Cost 600, Expenses 200

- Profit = 1000 - 600 - 200 = 200
- Margin = (200 / 1000) 100 = 20%

Markup Calculation

Markup % = ((Selling Price - Cost) / Cost) 100

Example: Cost 100, Selling 150

- Markup = ((150 - 100) / 100) 100 = 50%

Discount Calculation

Final Price = Original Price (1 - Discount %/100)

Example: Price 1000, 10% discount

- Final = 1000 (1 - 10/100) = 900

Factory Price Mall - RICT POS System V 1.0 - Setup Checklist

Pre-Launch Configuration Checklist

Phase 1: Database & Initial Setup (Admin)

Database Configuration

- [ ] Database connection verified and working
- [ ] All migrations applied successfully
- [ ] Sessions table created (`create_sessions_table`)
- [ ] Jobs table created (`create_jobs_table`)
- [ ] Concurrency indexes created (`add_concurrency_indexes`)
- [ ] Backup system configured and tested

Application Configuration

- [ ] `.env` file configured with correct credentials
- [ ] `APP_ENV=production` set for live environment

- [ ] `SESSION_DRIVER=database` configured
- [ ] `QUEUE_CONNECTION=database` configured
- [ ] Mail driver configured (if needed)
- [ ] Storage permissions set correctly
- [ ] Cache cleared and rebuilt

Phase 2: Company & System Setup (Super Admin)

2.1 Company Information

- [ ] **Company Name** entered in Admin Company
- [ ] **Company Email** added
- [ ] **Company Phone** added
- [ ] **Company Address** added
- [ ] **Tax ID** added (if applicable)
- [ ] **Logo/Branding** uploaded (if available)

2.2 Basic Data Creation

Categories

- [ ] At least 5 categories created (e.g., Groceries, Beverages, Electronics, etc.)
- [ ] Categories named consistently
- [ ] All categories match your product inventory

Units

- [ ] Pieces (PCS) created
- [ ] Kilograms (KG) created
- [ ] Grams (GM) created
- [ ] Liters (L) created
- [ ] Other relevant units created (BOX, CTN, PKT, etc.)

Suppliers

- [ ] Primary suppliers registered (at least 3)
- [ ] Contact information accurate
- [ ] Payment terms noted (if applicable)
- [ ] Supplier addresses verified

Customers

- [ ] "Walk-in Customer" default entry created
- [ ] Retail chain customers added (if applicable)
- [ ] Corporate customers added (if applicable)
- [ ] At least 1 test customer created

Expense Categories

- [ ] Rent
- [ ] Utilities

- [ ] Salaries
- [ ] Transportation
- [ ] Marketing
- [ ] Maintenance
- [ ] Insurance (if applicable)
- [ ] Other

Phase 3: Product Setup (Manager/Admin)

3.1 Product Master Data

- [ ] At least 20 products created as baseline
- [ ] Products assigned to correct categories
- [ ] Products assigned to correct units
- [ ] Product names are clear and consistent
- [ ] Barcodes added for each product (if available)
- [ ] Initial quantities set correctly

3.2 Product Pricing

For each product:

- [ ] **Cost Price** entered (what you pay for product)
- [ ] **Selling Price** entered (what customer pays)
- [ ] **Profit Margin** calculated (Selling - Cost)
- [ ] Pricing reviewed for competitiveness

Example Pricing Check:

```
Product: Rice 5kg
Cost Price: 150
Selling Price: 200
Profit: 50 (33% markup)
 Acceptable
```

3.3 Stock Levels

- [ ] Initial inventory quantities entered
- [ ] Stock matches physical count
- [ ] Low-stock threshold defined
- [ ] Out-of-stock items identified
- [ ] Restocking plan created

Phase 4: User Management (Super Admin)

4.1 User Accounts

Create users for each role:

Cashiers (create at least 2)

- [ ] User created with unique email

- [ ] Temporary password set
- [ ] Password changed by user on first login
- [ ] Cashier role assigned
- [ ] Permissions verified:
  - `sales-create`
  - `invoice-create`
  - `cash-reconciliation-create`
  - `cash-reconciliation-edit`
  - `cash-reconciliation-list`

Supervisors (create at least 1)

- [ ] User created with unique email
- [ ] Password configured
- [ ] Supervisor role assigned
- [ ] Permissions verified:
  - `cash-reconciliation-list`
  - `cash-reconciliation-show`
  - `cash-reconciliation-approve`
  - `cash-reconciliation-reverse-approval`

Managers (create at least 1)

- [ ] User created with unique email
- [ ] Password configured
- [ ] Manager role assigned
- [ ] Permissions verified for all purchase/inventory functions

Super Admin (usually owner/administrator)

- [ ] Super Admin account verified
- [ ] Password changed from default
- [ ] Backup admin account created (emergency access)

4.2 Security Setup

- [ ] All default passwords changed
- [ ] Password policy communicated (8+ characters recommended)
- [ ] User account status verified (active)
- [ ] Login tested for each user type
- [ ] Logout tested to ensure session clear

Phase 5: Role & Permission Verification (Super Admin)

Verify each role has correct permissions:

Cashier Permissions (Sales Entry)

- [ ] `sales-create` - Create new invoices
- [ ] `invoice-create` - Create sales transactions

- [ ] `cash-reconciliation-list` - View reconciliations
- [ ] `cash-reconciliation-create` - Create reconciliation
- [ ] `cash-reconciliation-edit` - Edit own reconciliation

Supervisor Permissions (Approval Authority)

- [ ] `cash-reconciliation-list` - View all reconciliations
- [ ] `cash-reconciliation-show` - View details
- [ ] `cash-reconciliation-approve` - Approve submissions
- [ ] `cash-reconciliation-reverse-approval` - Reverse approvals

Manager Permissions (Operations Management)

- [ ] All product management permissions
- [ ] Purchase creation & management
- [ ] Inventory adjustments
- [ ] Expense creation
- [ ] All read permissions for reports
- [ ] Customer/supplier management

Super Admin Permissions

- [ ] All permissions enabled
- [ ] User management access
- [ ] Role management access
- [ ] System configuration access

Phase 6: Training & Documentation (All Staff)

For Cashiers

- [ ] Training session completed on:
  - [ ] Creating invoices
  - [ ] Entering products correctly
  - [ ] Recording payments
  - [ ] Daily cash reconciliation process
  - [ ] Handling mistakes/cancellations
- [ ] Quick reference guide provided
- [ ] Login credentials provided securely
- [ ] Practice transactions completed successfully
- [ ] Questions answered and documented

For Supervisors

- [ ] Training on:
  - [ ] Approving reconciliations
  - [ ] Viewing reports
  - [ ] Identifying discrepancies
  - [ ] Handling rejections

- [ ] Approval workflow explained
- [ ] Variance threshold explained (typically 5%)
- [ ] Emergency procedures explained

For Managers

- [ ] Complete system training provided
- [ ] Report generation explained
- [ ] Purchase process detailed
- [ ] Inventory management covered
- [ ] Financial analysis demonstrated

For All Staff

- [ ] User documentation distributed (USER_DOCUMENTATION.md)
- [ ] Quick reference guide provided (QUICK_REFERENCE.md)
- [ ] Support contacts shared
- [ ] FAQ answered
- [ ] Escalation procedures explained

Phase 7: Testing - Pre-Launch Verification

7.1 Basic Functionality Tests

User Login

- [ ] Cashier can login
- [ ] Manager can login
- [ ] Supervisor can login
- [ ] Super Admin can login
- [ ] Invalid login rejected
- [ ] Sessions timeout after inactivity

Dashboard

- [ ] Dashboard loads without errors
- [ ] Today's stats display correctly
- [ ] Menu items visible based on role
- [ ] No permission errors for authorized users

Navigation

- [ ] All authorized menu items accessible
- [ ] Unauthorized items hidden
- [ ] Page transitions smooth
- [ ] No 404 errors

7.2 Transaction Tests

Invoice Creation (by Cashier)

- [ ] Create test invoice with customer "Walk-in"

- [ ] Add multiple products (5-10 items)
- [ ] Verify quantities correct
- [ ] Verify prices correct
- [ ] Verify total calculation
- [ ] Save successfully
- [ ] Stock updated correctly
- [ ] Invoice number auto-generated
- [ ] Print functionality works

Purchase Creation (by Manager)

- [ ] Create test purchase from supplier
- [ ] Add multiple products
- [ ] Verify costs entered
- [ ] Save successfully
- [ ] Stock increased
- [ ] Purchase number auto-generated

Stock Adjustment (by Manager)

- [ ] Create test adjustment (decrease)
- [ ] Verify stock decreased
- [ ] Create test adjustment (increase)
- [ ] Verify stock increased

Expense Entry (by Manager)

- [ ] Create test expense
- [ ] Select category
- [ ] Enter amount and date
- [ ] Save successfully

7.3 Cash Reconciliation Tests

Cashier Reconciliation

- [ ] Create reconciliation at end of test day
- [ ] System auto-fills sales total
- [ ] Enter physical cash count
- [ ] Variance calculated correctly
- [ ] Submit for approval successfully

Supervisor Approval

- [ ] Pending reconciliation visible
- [ ] Can view full details
- [ ] Can approve
- [ ] Can reject with notes

7.4 Report Tests

Profit Report

- [ ] Generate with date filter
- [ ] Totals calculated correctly
- [ ] Layout displays properly
- [ ] Can print

Expense Report

- [ ] Generate expense report
- [ ] Categories display correctly
- [ ] Totals correct

Stock Report

- [ ] Current quantities accurate
- [ ] Total values calculated
- [ ] Low stock items flagged

Stock Ledger

- [ ] Movements display chronologically
- [ ] Balances accurate
- [ ] References correct

7.5 Performance Tests

Concurrent User Test

- [ ] 2 users create invoices simultaneously
- [ ] Invoice numbers don't duplicate
- [ ] Stock updates correctly
- [ ] No data corruption

Data Entry Speed

- [ ] Invoice creation: < 3 minutes with 10 items
- [ ] Search product: < 5 seconds
- [ ] Generate report: < 30 seconds

Database Locks

- [ ] No deadlocks observed
- [ ] Locking mechanism working
- [ ] Row-level locks preventing lost updates
- [ ] Retry logic functioning (if errors occur)

7.6 Security Tests

- [ ] Unauthorized users cannot access restricted data
- [ ] Permissions enforced correctly
- [ ] User cannot see other user's data
- [ ] Sensitive information not logged

- [ ] HTTPS/SSL enabled (if remote deployment)

Phase 8: Data Backup & Recovery

- [ ] Backup system configured
- [ ] Backup schedule set (daily minimum)
- [ ] Test backup restore procedures
- [ ] Backup location verified (not on same server)
- [ ] Backup retention policy set (30+ days recommended)
- [ ] Recovery procedure documented
- [ ] Team trained on recovery process

Phase 9: Go-Live Preparation

9.1 Pre-Launch (24 hours before)

- [ ] Database backed up
- [ ] All staff notified of go-live time
- [ ] Test environment cleared
- [ ] Production environment verified ready
- [ ] Support team briefed
- [ ] Emergency contacts identified
- [ ] Escalation procedures confirmed

9.2 Go-Live Execution

- [ ] Morning meeting with all users
- [ ] System access verified for all users
- [ ] Initial test transactions completed
- [ ] Supervisor team ready for reconciliation approval
- [ ] Manager standing by for issues
- [ ] Support line available

9.3 First Day Monitoring

- [ ] Monitor dashboard for errors
- [ ] Watch queue processing
- [ ] Monitor database performance
- [ ] Collect user feedback
- [ ] Address issues immediately
- [ ] Document any problems
- [ ] Run evening reconciliation successfully

Phase 10: Post-Launch Follow-up

Day 1-2

- [ ] Daily standups with users
- [ ] Collect feedback on usability

- [ ] Address urgent issues only
- [ ] Monitor system performance
- [ ] Verify reconciliation process working

Week 1

- [ ] Generate first week reports
- [ ] Review data quality
- [ ] Collect improvement requests
- [ ] Verify backup/recovery working
- [ ] Train additional staff if needed

Month 1

- [ ] Generate full month financial reports
- [ ] Compare to expectations
- [ ] Optimize system performance if needed
- [ ] Create post-launch review document
- [ ] Plan for additional features/improvements

Operational Checklist - After Launch

Daily (Operations Team)

Morning

- [ ] System access verified
- [ ] All users logged in successfully
- [ ] Dashboard displayed correctly
- [ ] No error messages

During Day

- [ ] Monitor transaction volume
- [ ] Watch for any system errors
- [ ] Respond to user questions
- [ ] Document issues for resolution

Evening

- [ ] Cashiers complete reconciliation
- [ ] Supervisor approves reconciliation
- [ ] Daily summary generated
- [ ] Any issues logged for tomorrow

Weekly (Manager)

- [ ] Profit report reviewed
- [ ] Expense report reviewed
- [ ] Stock levels checked
- [ ] Any low-stock items identified

- [ ] Purchase orders created if needed
- [ ] Week summary reported to owner

Monthly (Super Admin)

- [ ] Full financial review
- [ ] Profit & loss analysis
- [ ] Variance investigation (if any)
- [ ] System health check
- [ ] Backup verification
- [ ] User access review
- [ ] Next month planning

Troubleshooting During Setup

Issue	Solution
Users can't login	Verify credentials, check user active status, clear browser cache
Transaction won't save	Check required fields, verify user permissions, check database connection
Stock not updating	Verify migration applied, check transaction saved, refresh page
Report empty	Verify data exists, check date range, ensure user has permission
Slow performance	Check server resources, clear cache, restart application server
Reconciliation stuck	Verify supervisor has access, check approval process, restart if needed
